QUICK PROGRAMMING INSTRUCTIONS

SET CALENDAR, TIME AND DAY

Turn the dial to the **"Clock / Calendar"** position. The hour will be flashing. Use **+** or **—** to adjust.

NOTE: *AM/PM.* **Press** ➡ *button and the minutes will flash. Use* **+** *or* **—** *to adjust.* **Press** ➡ *and the day of the week will flash. Use* **+** *or* **—** *to set the correct day.*

SET CALENDAR

This is optional and only needs to be set in areas with ODD/EVEN day watering restrictions. **Press** ⬅ button and adjust using **+** or **—**. **Press** ⬅ to change other calendar settings.

SET AUTOMATIC PROGRAMS *(Set one program at a time)*

Each start time will activate all the valves in that program in sequential order.

STEP 1: SET START TIME(S)

Turn the dial to **"Set Start Times"** position (select from up to 6 per program). Start 1 will flash. Proceed to set Start 1 by **pressing** ➡ & using **+** or **—** to adjust the hour. **Press** ➡ and the minutes will flash, use **+** or **—** to adjust. **Press** ➡ to return to Start 1. If a second start time is required, **press +**. Then proceed as per setting up Start 1.

TIP: *To turn a start OFF, select the start number & press* ➡ *, the hour will flash. Use* **+** *or* **—** *until OFF is shown.*

STEP 2: SET WATERING DAYS

This unit has the option of Individual Day Selection or ODD/EVEN day selection or Interval Watering.

Turn the dial to the **"Set Watering Days"** position.
A) INDIVIDUAL DAY SELECTION:
The display will show the 7 days of the week, Program 1 & Day 1. To turn Monday off, **press —** and advance to Tuesday (Day 2) by **pressing** ➡ . Proceed for the 7 days using **—** to turn days off and **+** to leave days active.
B) ODD/EVEN DAY SELECTION:
Only for the area with water restrictions.
Press the ➡ button until ODD or EVEN are shown.
C) INTERVAL WATERING:
Press ➡ until the display shows interval 1 flashing. Press **+** to change. Select from everyday to every 15th day.

STEP 3: SET STATION RUN TIMES

Maximum watering time is 12 hours and 59 minutes.
Turn the dial to **"Set Station Run Times"** position, and the display will show Program 1, Station 1 flashing and run time **"OFF"**. To set run time, **press** ➡ and adjust minutes using **+** or **—**. To set hours (if required), **press** ➡ and adjust using **+** or **—**. Advance to Station 2 by **pressing** ➡ and **+**, continue until all stations in program 1 have been set. To turn a station OFF, press **—** when the minutes are flashing, or press **+** or **—** together when the station number is flashing. This completes the setting of program 1. If you require another program, press the program button **P** and proceed as for setting program 1.

TIP: *Turn the dial to "Auto Run" position, once automatic programs have been set.*

RUN A SINGLE STATION

To manually run a single station once, turn the dial to **"System Test or Run Single Station"**. The display will show Station 1 Run Time 10 minutes. **Press** ➡ twice to advance and use **+** or **—** to adjust the run time.

RUN A PROGRAM ONCE

To manually run a complete program once as per the run times set in the automatic schedule, turn the dial to **"Run Program"** position. Use **P** to advance to the required program number, **press —** to enable this program and **press** ➡ to start the watering.

TEST THE SYSTEM

This feature is preset for 2 minutes per station and can be adjusted. Turn the dial to **"System Test or Run Single Station"** and the display will show station 1, run time 10 minutes. **Press +** and **—** simultaneously and the run time will change to 2 minutes. Adjust **+** or **—** and start with ➡ .

STOP

To stop an automatic program or manual program, turn the dial to the **"Off"** position. This is ideal during winter as it stops the automatic programs.

TIP: *Remember to turn the dial back to "Auto Run" position if you want to continue automatic watering.*

WATER BUDGETING

The automatic station run times can be adjusted by % as the seasons change. Ensure the dial is in the **"Auto Run"** position & **press** ⬅ . The display will show 100% which is the current run times set in the automatic programs. To adjust in 10% increments, use **+** or **—**. Maximum adjustment is 200% and minimum adjustment is 10%. To return to the clock **press** ➡ .

NOTE: *All the automatic run times will be adjusted.*

RAIN SENSOR OPTION

When using a standard rain sensor, connect the cables to the terminal blocks marked **"R"** and **"C"**. Turn the dial to **"Set Auxiliaries"** to enable individual stations to be set rain sensor **"ON"** or **"OFF"**. The stations set to **"ON"** will be controlled by the rain sensor and will not water automatically when the switch is in the **"WET"** mode. The stations set to **"OFF"** will water automatically at all times. To set individual stations use **+** button for **"ON"** & **—** for **"OFF"**. **Press** ➡ to advance & set all stations **"ON"** or **"OFF"**. NOTE: At first power up, all stations will be in the **"ON"** mode.

TIP: *To bypass the rain sensor, move the rain switch to the "OFF" position.*
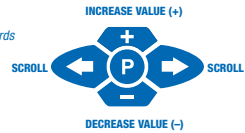

BASIC CONTROL OPERATION:

TURN THE DIAL TO THE REQUESTED SETTING

* Using either arrows ⬅ ➡ *takes you forward and backwards within the program.*

* Use **+** *or* **—** *to adjust any "flashing" values.*

* Use the **P** *to advance through programs.*
